Prince Sojitra

Senior iOS Developer

PROFESSIONAL SUMMARY

- Senior iOS Developer with 12+ years of experience designing, architecting, and delivering scalable, high-performance mobile applications across fintech, telecom, healthcare, gaming, real estate, and enterprise domains.
- **Technical Expertise:** Strong proficiency in Swift, SwiftUI, UIKit, Combine, RxSwift, and Objective-C, with expertise in modern iOS development, concurrency, multithreading, and performance optimization.
- **Architecture & Engineering:** Experienced in Clean Architecture, MVVM, backend-driven UI, OpenAPI-driven development, dependency injection, feature flags, localization, and CI/CD pipelines.
- **Technical Leadership:** Proven ability to drive end-to-end feature delivery, mentor developers, collaborate with cross-functional teams, and translate complex business requirements into maintainable, user-centric solutions.
- **Product Impact:** Focused on application scalability, reliability, code quality, and performance, delivering production-ready mobile experiences across diverse business domains.

KEY SKILLS

Coding Languages
Objective C, Swift, Dart (Foundational knowledge)

Architecture
MVC, MVVM, MVVM+C, MVP, Clean, Dependency Injection

AI & Tools
AI-assisted development, agentic development workflows, REST APIs, OpenAPI, Xcode, Git, SPM, Xcode Cloud, Fastlane, Split.io, Luciq

Frameworks
Combine, UIKit, SwiftUI, RxSwift, Cocoa Touch, Local Authentication, Push Notifications, Core Data, Firebase, StoreKit , Swift Concurency

Development Practices
Agile, Unit Testing, Code review, A/B Testing, CI/CD.

WORK HISTORY

Senior iOS Developer — July'25 - Present

Property Finder (via TTF Technologies) — Remote

- Developed scalable iOS features for property discovery, search, transactions, and user engagement using Swift and SwiftUI.
- Integrated Split.io for feature flags and A/B testing, and Luciq SDK for application performance monitoring.
- Implemented OpenAPI-driven API integrations and contributed to backend-driven UI, localization, and modular architecture.
- Contributed to key product features, including AI-powered property valuation, transaction experiences, and agent rating.
- Participated in architecture discussions, code reviews, technical planning, and code quality improvements.
- Collaborated with product, design, and backend teams to deliver reliable, maintainable mobile experiences.

Senior iOS Developer — May'22 - June'25

Axio Digital Private Limited — Pune

- Developed and maintained fintech iOS applications for Buy Now, Pay Later (BNPL), personal loans, and money management using Swift, RxSwift, and MVVM architecture.
- Designed reusable, modular components to improve code maintainability, reduce complexity, and support scalable feature development.
- Integrated secure REST APIs, troubleshot production issues, and contributed to debugging, performance optimization, and release management.
- Conducted code reviews, mentored junior developers, and collaborated with product, QA, and backend teams to deliver reliable features in Agile environments.

Technical Lead — Nov '20 - May'22

My Telstra (via Wipro Limited) — Pune

- Developed and maintained Help & FAQ modules for the My Telstra application used by 4.5M+ users.
- Implemented scalable MVVM architecture with RxSwift for modular and maintainable feature development.
- Participated in peer code reviews and collaborated with QA, backend developers, and stakeholders for successful feature delivery.
- Contributed to Agile ceremonies, sprint planning, estimation, release activities, and production stability improvements.

EDUCATIONAL HISTORY

Bachelor of Technology Computer Engineering Jun '09 - May '13

Dharmsinh Desai University Nadiad

LANGUAGES

- English - Proficient
- Hindi - Proficient
- Gujarati - Native

Senior Software Engineer Jun '13 - Oct '20

DRC Systems India Limited Gandhinagar

- Developed and maintained multiple high-performance iOS applications across healthcare, enterprise, gaming, and business domains during a 7-year tenure.
- Gained strong expertise in Swift, Objective-C, UIKit, REST APIs, push notifications, reusable component development, and application performance optimization.
- Collaborated with cross-functional teams throughout the complete mobile application lifecycle including development, debugging, testing, deployment, and App Store releases.

PROJECT HISTORY

Property Finder

Real Estate | SwiftUI, RxSwift, MVVM, REST APIs

- Developed scalable real estate features focused on property discovery, search experience, and user engagement.
- Worked on backend-driven UI, OpenAPI integration, localization, feature flags, and modular architecture.

MY Telstra

Telecom | Swift, RxSwift, MVVM

- Developed Help & FAQ and self-service modules for the My Telstra application used by millions of users.
- Contributed to scalable architecture improvements, debugging, and release activities.

LECA Consultant

Enterprise / Solar Solutions | Swift

- Developed enterprise workflow application for consultation and installation management.
- Built calculator-based workflows and lifecycle tracking features.

PlayBill

Entertainment | Swift, Beacon Technology

- Built Broadway companion application with contextual venue-based experiences.
- Developed smart recommendation features using beacon technology.

TAP

Healthcare / Telemedicine | Swift, REST APIs

- Developed telemedicine platform for online consultations and prescription management.
- Integrated healthcare workflows and medicine delivery features.

axio: BNPL & Personal Loan

Fintech | SwiftUI, RxSwift, MVVM, REST APIs

- Developed fintech modules for BNPL, personal loans, and expense management solutions.
- Worked on scalable architecture, secure API integration, and performance optimization.
- Contributed to reusable component development, debugging, and production release activities.

Sun Keeper

Health & Fitness | Swift, Core Location

- Developed personalized sun exposure tracking features using location and skin type data.
- Implemented smart reminders and health-focused user experiences.
- Integrated backend-driven sun exposure calculations and displayed personalized recommendations based on user location and skin type data.

LECA Installer

Enterprise / Field Operations | Swift

- Developed installer workflow management and job tracking application.
- Implemented operational workflow optimization and validation features.

Big Joker Spades

Entertainment | Swift

- Developed multiplayer card game with custom gameplay mechanics and animations.
- Worked on game logic optimization and interactive user experiences.
- Integrated smooth gameplay interactions and optimized animations for better user engagement and performance.
